Application Value Assessment (AVA)

"Tailored Excellence in 4-6 Weeks: Elevate Your Portfolio with a Strategic Deliverable, Invest Smartly with ~$60,000"

FUJITSU

Application Value Assessment focuses on improving business capabilities, operational efficiency, adding value or reducing risks by quickly assessing a client's application portfolio.

- Our recommendations factor in the best treatment options for an application across a wide variety of scenarios and viewpoints.
- Receive a full AVA assessment on 100 applications or less plus a presentation on key observations and recommendations.
- Fujitsu holistic approach focuses on reducing risks, rationalizing apps to achieve cost savings and identifying cloud candidates in support of modernization efforts.

Scope
100 applications or less

Deliverables
- Full AVA assessment
- Complete report on findings and recommendations
- PPT presentation summary on key findings and recommendations

Value
- Clients have experienced a 10x in savings in comparison to the cost of the AVA assessment.
- Reduced technical debt and application value rankings to help prioritize key investments.
- Treatment recommendations for all in-scope applications will help generate roadmaps over the next 1 to 3 years.

Success story

Large city wide school board
- Mapped legacy application functionality with the SIS application result: clear understanding of gaps.
- Development of an action plan to resolve those gaps and recommendations for optimization initiatives. Implementation timeline minimized by 20%.
