

Data Life-Cycle Utilization

Supporting rapid decision-making using data and AI

Fujitsu supports our customers' management and business transformation through data by leveraging diverse data platforms and professional support. By deriving unprecedented solutions and insights from data, we enable our customers' DX (Digital Transformation) and the resolution of social issues.

This all-in-one platform addresses critical business and societal challenges, including enhancing customer experience, optimizing energy consumption, and mitigating fraud. It empowers rapid, data-driven decision-making through the integration of advanced AI capabilities, enabling:

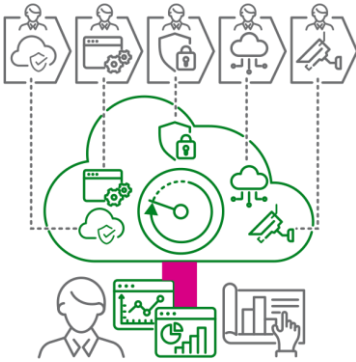

- Consolidating and analyzing data from multiple sources at pace.
- Building and deploying ready-made AI engines without coding experience.
- Uncovers insights to turn data into intelligence.

Greater value with data and AI today

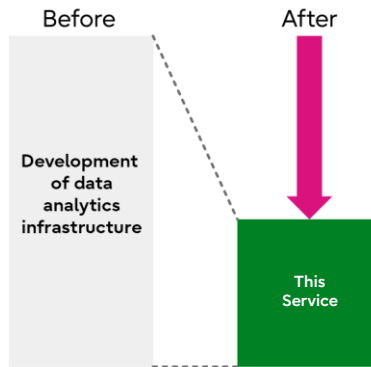

<p>AI for Business</p> <p>AI applications that are proven to solve pressing business challenges of our time</p>	<p>Rich Templates</p> <p>To provide an all-in-one package including AI functions and data based on accumulated industry cases. (Flexible combinations are possible)</p>	<p>Quick to deploy environment</p> <p>Templated various functions can be combined and provided quickly</p>	<p>Support for AI and data analytics</p> <p>Consulting and data science support services to extract the best value from the platform</p>

Key Benefits

Shortened lead time to start data analysis

Data management environments and tools such as ETL, DWH, and BI don't need to be built and deployed separately, and can be delivered immediately upon launch

Reduced development and operations costs

Halved man-hours spend on conventional development*
 *Average reduction of 50% (based on internal examples)

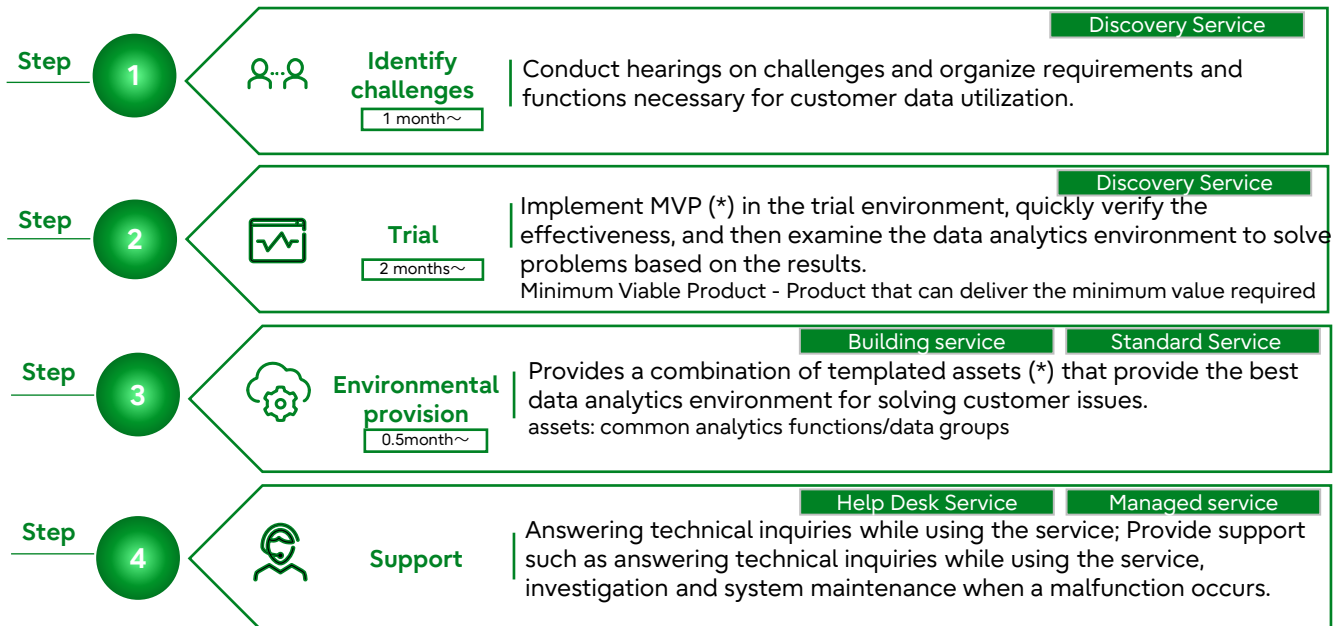

Easy manage the functions and data sets required for analytics and reduce operational costs

Enhance productivity and creativity

Automatic delivery of timely and easy to understand reports (leveraging GenAI). Empower business leaders with data-backed insights to make informed decisions.
