

Strengthen Consumer Touchpoints Unified Commerce Platform

Rapid changes in lifestyle and technology are transforming purchasing behavior across channels. Retailers are expected to provide seamless experiences across all their touchpoints, integrated omnichannel processes across various sales channels, along with personalized services for each customer. COUD4RETAIL provides a commerce platform that integrates core functions and supports extensibility with open APIs. It also offers front-end applications for all customer touchpoints. This provides flexibility to implement innovative retail concepts faster, even in a rapidly changing market, and helps create lasting customer value.

Service Overview

A cloud-based full-service unified commerce platform for retailers of all sizes and segments. For modern retail businesses to provide flexible and efficient consumer and employee experiences. Recognized by independent analysts for industry-leading and innovative approaches.
