

Streamline, connect, innovate your enterprise business on Microsoft Power Platform

Fujitsu Extend & Innovate, allows customers to break free of existing core enterprise system or Line of Business (LoB) constraints & start transforming enterprise data via Power Platform & Azure to experience & benefit from fully integrated digital ecosystem.

Cloud adoption and no-code/low-code platforms are transforming enterprises. While ERPs reliably manage core functions like finance and HR, their limited customization and high upgrade costs hinder support for diverse, end-to-end workflows. This shift emphasizes the need for more flexible, adaptable solutions. We empowers your organizations to create efficient, integrated user-friendly experiences for your staff, customers and partners.

Our Approach

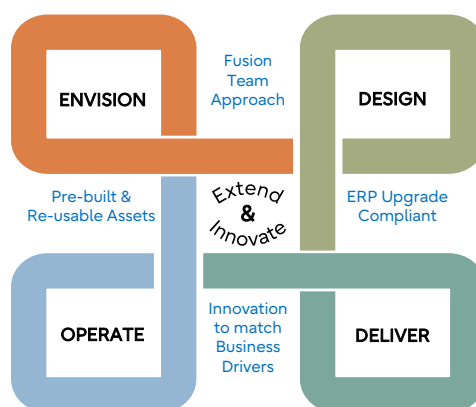

Fujitsu's Extend & Innovate is a full lifecycle offering, that extend customers enterprise ERP functionality leveraging Power Platform, Fujitsu Experience & proven best practices.
