# FUJITSU

# Endpoint Detection and Response

(EDR) Trusted by design

## This EDR service delivers the precision, validation, and speed modern endpoint defence demands.

Our Managed Security Endpoint Detection and Response service delivers continuous protection across your endpoint fleet using globally proven methodologies and local expertise. Backed by our position as a CrowdStrike Elite Partner and Microsoft Security Partner, we provide granular visibility, precise detections, and rapid containment actions.

Our experience supporting critical organisations across APAC and responding to major incidents ensures highly effective, practical threat defence.

**24/7 endpoint monitoring and alert triage**

## Outcomes

**Lowered exposure** to ransomware and endpoint intrusion.

**Faster**, more controlled containment and reduced attacker dwell time.

**Improved clarity** and oversight across endpoint and user activity.

**Clear**, consistent operational assurance.

# How we protect you

**24/7** endpoint monitoring and alert triage.

**Advanced** behaviour-based detections and threat hunting.

**Analyst-led** investigations leveraging CrowdStrike and Microsoft Defender.

**Isolation**, containment, and response actions.

**Telemetry correlation** with SIEM, NDR, and identity platforms.

**Executive-level reporting** and Security assurance.

# Why choose us?

Enterprise-trusted endpoint protection aligned to global best practice.

High-fidelity detections validated by expert analysts.

Rapid, consistent, and guided containment actions.

Behavioural threat hunting powered by global intelligence and local context.
