

IRAP Security Assessment for PSPF and ISM Compliance

Securing government systems with confidence

Our IRAP assessment helps organisations meet the Australian Government's cyber security requirements, aligned with the Protective Security Policy Framework (PSPF) and Information Security Manual (ISM).

We understand the pressure agencies and vendors face when navigating the IRAP assessment process. That's why we've built a delivery model that simplifies your journey, backed by experienced assessors with deep technical expertise and a strong understanding of government security frameworks. Whether you're designing a new PROTECTED system or seeking re-assessment, we'll guide you through every step with confidence.

 <p>Why IRAP matters?</p>	<p>Required for government systems storing classified or sensitive data.</p>	<p>Supports accreditation and procurement decisions.</p>	<p>Demonstrates security posture aligned to ISM and PSPF.</p>	<p>Valid for 24 months, with expected remediation plans.</p>

Our IRAP assessors have proven delivery experience to ensure your systems are certified with confidence

- 

System security review

In-depth review of your security documentation, controls, and architecture against ISM requirements.
- 

Aligned to federal standards

Built to comply with PSPF and ISM requirements to allow you to certify your systems with confidence.
- 

IRAP assessment report

Formal deliverables prepared by certified assessors to support authorisation or investment decisions.
- 

Gap and risk identification

Findings that show what's working, what's missing, and what needs uplift.

PSPF & ISM

We provide a full-service offering:

- IRAP readiness assessments
- Formal IRAP security assessments
- Remediation and risk advisory
- IRAP-aligned hosting and managed services.

Our approach

Clear steps, structured reviews:

Our IRAP assessors bring real-world experience to every assessment, regardless of the tech stack. We simplify the IRAP process with clear steps, structured reviews, and minimal disruption.

Collaborative delivery:

Our approach ensures smooth transitions, reduced complexity, and a collaborative partnership throughout your IRAP journey.

Actionable, expert-led outcomes:

Get more than a report - receive practical recommendations and guidance to support authorisation or investment decisions.

Our IRAP service helps government, cloud providers, and managed service firms assess risk, infrastructure, and compliance. With years of experience supporting federal agencies, we provide clear insights into your security controls and actionable steps to protect systems and data.

In as little as 12 weeks, you'll have a full IRAP assessment, making the path to compliance easier to navigate and less resource heavy.

Why our assessment is the **smart choice** for Federal Agencies and partners?

Faster compliance

Streamline assessments help you meet compliance timelines with less disruption.

Built-in expertise

Delivered by experienced IRAP assessors and senior advisors with deep understanding of the PSPF and ISM and strong technical expertise.

Confidence in your uplift

Know exactly where you stand and what's needed to move forward with certification or uplift.

Contact us today to see how we can support your IRAP journey, without the guesswork.
