

# Security Operations Centre Augmentation

Expertise on demand

## Reinforce your cyber operations with the right people at the right time - quickly.

Our Security Operations Centre (SOC) Augmentation service provides skilled analysts, threat hunters, and engineers to support your internal teams. Whether addressing capacity constraints, surge events, or strategic projects, we supply high-quality cyber capability without the cost and delay of recruitment.

Our experts integrate seamlessly with your ways of working, adopting your processes, tools, and operations to provide a consistent, high-quality extension of your existing team. With flexible engagement options and access to specialised capability on demand, you can maintain confidence in your security posture.

## Outcomes

**Increased** operational capacity.

**Faster** response outcomes.

**Reduced backlog** and analyst fatigue.

**More mature,** consistent cyber operations.

## How we protect you

**SOC Level 1–3** analyst support.

**Threat hunting** and detection engineering.

**Playbook** and process development.

**Backfill** for leave, project delivery, or capacity gaps.

**Maturity uplift** and operational optimisation.

**Security use-case development** and tuning aligned to MITRE ATT&CK.

## Why choose us?

Access to certified Fujitsu cyber specialists across multiple disciplines.

Rapid uplift of capability for projects, incidents, or ongoing operations.

Flexible and scalable engagement models.

Improved resilience during peaks, audits, or major initiatives.
