

SOC Readiness Assessment

Assurance through clarity

Evidence-backed clarity into your SOC's strengths, gaps, and readiness to respond.

Our SOC (Security Operations Centre) Readiness Assessment provides a comprehensive review of your capability, tooling, and processes. Using industry recognised, global frameworks, and insights from real incidents, we identify gaps and deliver a tailored roadmap to uplift detection and response maturity.

We support you based on the findings of the assessment to ensure your detection and response expectations are effective to reduce exposure to real world threats.

An independent assessor provides the impartial assurance and executive-level confidence needed to clearly demonstrate your SOC's readiness and uplift priorities.

Outcomes

Higher readiness for evolving threats.

Strengthened governance and incident response posture.

Better alignment with regulatory and framework expectations.

Increased confidence across leadership and stakeholders.

How we protect you

Maturity assessment and benchmarking.

Detection, tooling, and integration **review**.

Playbook and process **evaluation**.

Gap analysis and prioritised uplift roadmap.

Executive-level reporting.

Threat-aligned capability assessment against **real-world attack scenarios**.

Why choose us?

Independent assessment aligned to global and AU/NZ standards.

Clear, prioritised recommendations for uplift.

Practical guidance informed by experience.

Strong executive assurance for boards, auditors, and regulators.
