AI & Data Science Accelerator

Rapidly changing how businesses operate, while driving innovation

Customer Challenge

Data Science and Artificial Intelligence concepts and technologies are changing the way organisations operate, as well as creating new opportunities for growth, and increasing business efficiency and productivity. The challenge is where do you start if you really want to accelerate value?
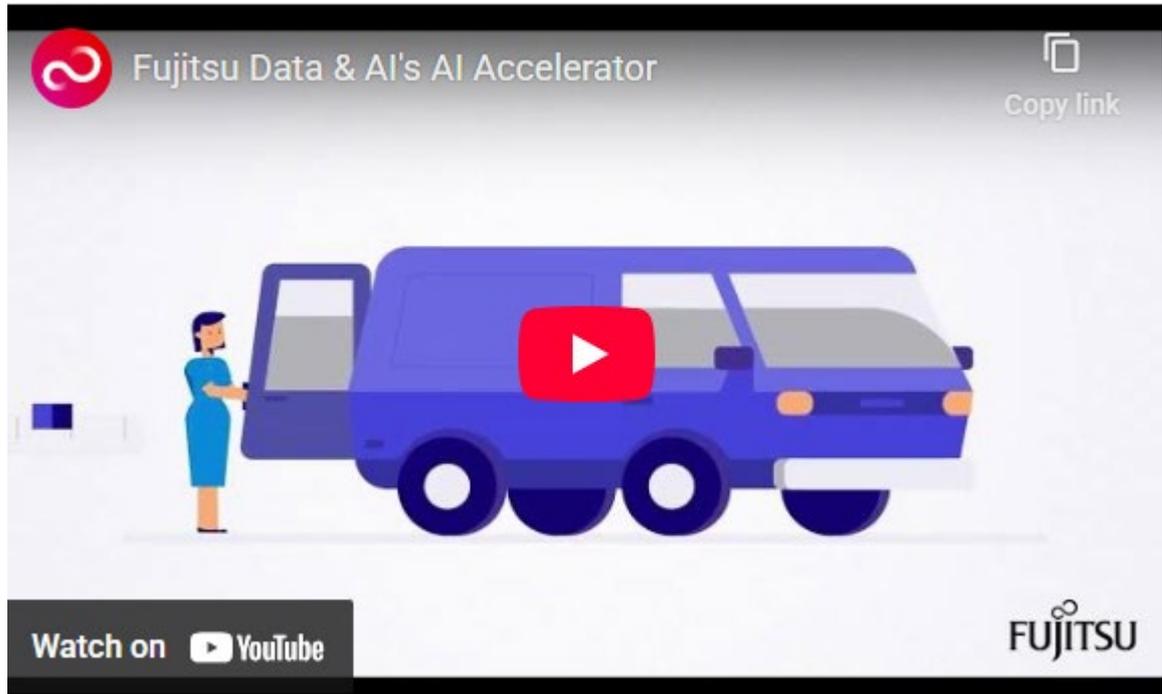

Solution

Our AI Accelerator Program is a 10-day collaborative engagement framework that enables businesses to:

- Discover the potential and opportunities that AI can provide to their business
- Identify business opportunities well suited for AI
- Kick start their AI journey through the development of a POC solution
- Provide a clear path to operationalising AI and unlocking commercial value

Customer Value

- Well designed, intuitive reports and dashboards that encourage user adoption and self-serve reporting
- Reduced resource demands from IT departments
- Enhanced data security through the provision of governance, role definition and process clarity
- More effective collaboration, and sharing of data and insights amongst users
