FUJITSU

Cyber Risk Assessment

Turn risk into clarity, and clarity into action

Structured risk assessments that uncover threats, highlight priorities, and provide a practical path forward.

At Fujitsu, we understand that risk management is often overwhelming. Identifying threats, assessing likelihoods and impacts, and deciding where to act first can drain resources and stall decision-making. Our Cyber Risk Assessment simplifies this process.

We analyse your systems, environment, and business context to identify risks, map them against impact and likelihood, and give you a prioritised plan to reduce exposure. Whether you're seeking to comply with regulatory requirements, support investment decisions, or improve resilience, we make risk management structured, clear, and actionable.

Threat modelling

Contextual analysis of your systems, environment and threat landscape.

Risk register development

Documented risks with likelihood, impact and risk ratings.

Heatmap and reporting

Visual summaries that make risks easy to communicate at every level.

Recommendations and roadmap

Clear actions to reduce exposure and strengthen resilience.

Why it matters for organisations

Visibility of risks	See security issues across systems, processes, and people, aligned to business priorities.
Prioritised action	Focus on the most critical risks with clear heatmap of likelihood and consequences.
Confidence to act	Support board reporting, funding requests, and compliance with evidence-based findings.

Our approach

Expert-led assessments

Our consultants bring hands-on experience across government and enterprise, delivering grounded and practical assessments.

Practical and low impact

Designed to work with your team, not burden them.

Tailored outputs

Focused on your specific environment, industry, and threat profile.

Rapid turnaround

Receive findings and recommendations when you need them most.

We understand that no two organisations face the same risks. Our approach adapts industry best practices to your unique context, ensuring an assessment is practical, focused, and ready to support critical decisions.

Duration:
Typically,
8 weeks

How quickly can you see results? Our Cyber Risk Assessment is designed to be light on your team and high on value. Within just 8 weeks, you'll have a clear view of your risks, clear priorities, and a recommendation to discuss them, all without the heavy lifting.

Clear and streamlined

A structured process that minimises complexity and disruption.

Actionable findings

Findings translated into risks and actions you can address immediately.

Long-term value

Use the outputs to inform strategy, compliance and investment decisions.

Proven success

Trusted by organisations across government and enterprise clients.
