

Cyber Security Board Advisory Services

Independent cyber assurance and advice for boards

On-demand access to independent cyber security advisors who support boards with governance, assurance, and strategic oversight, separate from internal IT and security teams.

What we do

Our board advisory services deliver senior cyber security subject matter expertise directly to the board, either as an independent board advisor or board-appointed advisor, operating separately from the organisation's internal IT and Cyber teams.

Flexible engagement model

Engagements are typically delivered on a retainer basis, allowing a defined allocation of advisory hours that can be utilised flexibly across board meetings, briefings and ad hoc consultations. This provides board-level cyber expertise without the overhead of permanent appointments.

Independent assurance

Gain objective cyber oversight separate from management and internal IT teams.

Board confidence

Equip directors with trusted advice to meet governance and fiduciary responsibilities.

Specialist expertise

Access senior cyber advisors with both technical depth and board-level governance experience.

Risk aligned

Tailored to board priorities, risk appetite and regulatory drivers.

We understand the increasing complexity of cyber risk at the board level. Our Board Advisory service is designed to integrate seamlessly into existing governance structures while maintaining independence and objectivity.

Why cyber board advisory?

Boards are increasingly accountable for cyber security risk, yet many lack independent, specialist, advice to effectively challenge, assure and guide management, relying solely on internal IT or security reporting can limit visibility, objectivity and assurance.

Fujitsu provides boards with independent, expert cyber security advice to support informed decision-making, strengthen governance, and meet regulatory and fiduciary obligations.

This service is designed for organisations that require, trusted, board-level cyber expertise without embedding operational responsibility within management.

Industry experience and credentials

Access to senior cyber security advisors who hold:

- Advanced cyber security qualifications.
- Board governance certifications (e.g. Australian Institute of Company Directors).
- Deep experience across government, regulated industries and critical infrastructure.
- This dual capability cyber security expertise combined with formal board governance credentials, is a key Fujitsu differentiator.

Risk, governance and regulatory alignment

Advice aligned to recognised frameworks and obligations, including:

AICD Cyber Security
Governance Principles

SOCI Act obligations

Australian / New Zealand ISM

PSPF

ISO 27001

NIST Cyber Security
Framework

Strategic oversight

Board and committee engagements

Attendance at board and sub-committee meetings to provide expert insight, challenge assumptions and answer cyber-related questions.

Common challenges our consultants address

- Governance gaps
- Configuration and security control drift
