

# Essential Eight Assessment

Cyber resilience starts with clarity

The Essential Eight is the Australian Cyber Security Centre's (ACSC) baseline of mitigating cyber threats. Fujitsu Cyber's assessment helps organisations align with ACSC guidelines, meet regulatory obligations, and strengthen security posture, without disrupting operations.

Our team at Fujitsu Cyber provide a detailed report with a clear snapshot of your current status, with valuable recommendations for improvement, ensuring you are equipped with the knowledge to enhance your cybersecurity posture.

### What's in the assessment report?

- Tailored review of all Essential Eight mitigation strategies.
- Detailed maturity scorecard.
- Evidence-based findings.
- Actionable recommendations.

### Gain actionable insights

We implement controls across the Essential Eight to improve maturity levels and reduce risk, with a focus on maximising ROI from Microsoft 365 licensing as a starting point. Our team has extensive experience in both assessing and remediating, ensuring a comprehensive approach to elevating your cybersecurity posture.

**We're here to support you every step of the way, offering expert guidance and practical solutions to help uplift your security posture and remediate any gaps identified in your Essential Eight journey.**

#### Accelerated path to ACSC compliance

Gain confidence and stay aligned to government and industry expectations.

#### Identify gaps before they become a risk

Proactively reduce exposure to data breaches, ransomware, and insider threats.

#### Maximise ROI from existing tools

Optimise platforms, for example Microsoft 365, Tenable, and Ivanti.

#### Uplift roadmap and support

Prioritise improvements with clarity and confidence.

Not just for government and critical infrastructure, the Essential Eight is best practice cyber security for every organisation in Australia.

Suitable for organisations just starting or already on their Essential Eight journey.

Reporting on your Essential Eight maturity is now commonplace, whether it be for internal stakeholders or part of annual legislative and regulatory requirements.

Just because it's commonplace, doesn't mean it's always simple. You need to find an assessor you can trust who understands your organisation's specific security controls who can also give you recommendations to improve your position without impacting your business or disrupting your users.

**Trusted by Government agencies and high-risk departments.**

**Proven track record in both assessment and remediation.**

**Efficient delivery with minimal disruption to your team.**

Our human-centric approach allows us to quickly assess, report, and recommend improvements, saving you time and enhancing your security posture.

**Duration: Typically, 2 weeks**

At Fujitsu Cyber, our dedicated team is committed to providing continuous support and expert guidance at every step of your cyber resilience journey.

### Outcomes of an Essential Eight Assessment

- Accelerated path to ACSC compliance.
- Reduced risk exposure through targeted control implementation.
- Improved operational resilience and audit readiness.
- Communicate findings clearly to stakeholders and boards.

**We have partnered with organisations spanning various industries and sizes, we've even undertaken assessments on behalf of the ACSC for high-profile Federal Government organisations.**
