

Fujitsu MeatPro

Transform your meat business with connected operational and financial visibility.

Designed for the meat industry, MeatPro extends Microsoft Dynamics 365 Business Central with capabilities that streamline business processes and improve operational visibility.

Industry Challenges

Businesses operating across the meat supply chain face unique operational challenges that require specialised business solutions.

Supply constraints and volatile markets

Tight margins and limited cost visibility

Disconnected operational and financial systems

How MeatPro Transforms Operations

Increase Visibility Across Your Supply Chain

Gain visibility of animal supply, production activities, inventory and sales to support better planning and decision-making.

Maximise Margin and Profitability

Respond quickly to market changes with flexible pricing, detailed costing insights and improved yield visibility.

Streamline Operations

Connect procurement, production, inventory, sales and financial processes within a single integrated platform.

Why Fujitsu?

Over 20 years delivering ERP solutions for the meat industry

Proven functionality designed for meat operations

Local implementation experts backed by global Fujitsu capability

Ongoing support from industry specialists

Powered by Microsoft. Built for meat businesses.

MeatPro combines the reliability of Microsoft Dynamics 365 Business Central with specialised functionality that supports the operational requirements of the meat sector. The result is an ERP solution that improves visibility, profitability and operational efficiency.

1

Flexible Pricing

Respond quickly to changing livestock costs and customer agreements.

2

Accurate Multi-Unit Processing

Manage products confidently across carcass, carton, kilogram and customer-specific units.

3

Production Performance Insights

Understand profitability throughout production, not just at month end.
