

# MasterCare+

Global Health and Fujitsu have joined forces to bring the proven MasterCare+ mental health application to community and acute mental health facilities. Mental health professionals can now choose a single, integrated, digital client record across multiple teams, sites, programs and services.

## A Specialised Solution

MasterCare+ provides ample capacity to cover specialist private and public mental health services. It has a proven track record for supporting health professionals in management plans, outcome measures, data collection and reporting of all major Federal and State mental health and Drug & Alcohol programs. MasterCare+ comes ready to support specific needs such as:

- Outcome Measure Collection protocols
- Treatment events including Seclusion, Restraint, ECT and TMS
- Review events
- Mental Health Act Forms
- Consent Management

## A Technically Advanced SaaS Solution

MasterCare+ is licensed as a cloud-based Software as a Service. That leaves the technical management to us and allows the latest, evergreen solution version to be securely accessible from anywhere, at any time, on any connected device. The ease of use and accessibility of the solution helps mental health providers to concentrate on core business without the technical burden. The day-to-day management of the system is all handled by our experts, including:

- General functionality updates
- Updates to meet new regulatory requirements
- Updates to reference materials (e.g. MIMS medication)
- Security monitoring
- Performance monitoring

- Technical resource management
- Business continuity and Disaster Recovery
- Availability of the solution from wherever it is needed.

-  For community health
-  For private hospitals
-  For mental health
-  For AOD services
-  For allied health

### Mental health software for end-to-end client management and data reporting

- Improve clinical decision making across multi-disciplinary service teams
- Increase staff productivity and reduce your overhead costs
- Streamline your data collection processes and report to more funding programs
