

Microsoft 365 Assessment

Unlock a more productive and secure workspace in weeks

In just two weeks, you'll gain insights into your Microsoft 365 tenant's security posture, vulnerabilities, risks, and uncover opportunities for optimisation.

With thousands of security configuration settings in Microsoft 365, it can be difficult knowing where to start when you need to assess your security.

Our assessment helps you identify licensed but unused Microsoft 365 features that could boost ROI for your organisation. You'll receive a detailed report with key insights into your current configuration, highlighting opportunities to strengthen security, streamline operations, and support strategic improvement.

Gain actionable insights with our strategic report

The report identifies how your organisation can align with best-practice security benchmarks while making the most of your Microsoft 365 investment.

Beyond compliance, it draws on real-world expertise and industry insights to deliver actionable recommendations tailored to your organisation's unique needs.

Accelerated path to ACSC compliance

Gain confidence and stay aligned to government and industry expectations.

Identify gaps before they become a risk

Proactively reduce exposure to data breaches, ransomware, and insider threats.

Maximise ROI from existing tools

Optimise platforms like Microsoft 365, Tenable and Ivanti.

Uplift roadmap and support

Prioritise improvements with clarity and confidence.

So, what are we comparing your settings against?

We assess your Microsoft 365 tenant against the ASD Blueprint for Secure Cloud, the Australian Government's cybersecurity standard designed to safeguard organisations across the economy.

The assessment tool

Onboarding of the assessment tool 'Perimeta for 365' to connect to your Microsoft 365 tenancy. Perimeta for 365 is a powerful SaaS tool we designed to help your business reach and maintain the highest cyber security posture for all of the Microsoft 365 services that you depend on. It streamlines the configuration process, in addition to offering real-time monitoring and one-click remediation for configuration drifts.

Uplift support is available

We don't just tell you what can be improved, our experienced team can also uplift key areas based on the assessment findings, boosting and optimising your Microsoft 365 tenant.

We assess security configurations and unused features, review findings through optional workshops, deliver a comprehensive report, and provide ongoing expert support.
