

NIST CSF Cyber Security Maturity Assessment

Build your security baseline with a NIST-aligned lens

A comprehensive NIST Cybersecurity Framework assessment to benchmark, uplift and align your organisation's cyber posture.

At Fujitsu, we understand how complex and time-consuming it can be to manage cyber risk, meet compliance obligations, and align with evolving standards, especially when you're already stretched across multiple priorities.

That's why we've built a clear, guided assessment process that takes the heavy lifting off your plate, giving you the insights you need without being overwhelming.

Make your next cyber uplift faster, smarter and fully mapped to the NIST CSF

System and threat landscape review

Contextual analysis of your technology stack, business mission and cyber risk profile.

Maturity assessment against NIST CSF

Built to assess practices across all six NIST core functions.

Strengths, gaps and recommendations

Stay informed of your maturity level, capability gaps and security strengths.

Target state roadmap

Strategic remediation activities mapped to uplift priorities, including optional executive slide deck.

Expert-led assessments

Our consultants bring hands-on experience, delivering grounded and practical assessments.

Low impact

Streamlined process that fits around your team.

Trusted track record

Consistently delivering outcomes for government and enterprise clients.

Why NIST matters for forward-looking organisations

Clarity and control

Gain clear visibility over your cyber posture with structured insights across all six NIST functions. Align leadership, IT, and risk teams with a common view of priorities.

Foundations for compliance and uplift

Support your internal risk and compliance goals with a clear baseline assessment.

Confidence to act

Move beyond surface-level reporting. Receive clear findings and a strategic roadmap that guides your uplift activities, increases maturity and informs investment decisions.

Our approach

We understand the unique pressure and priorities that organisations face when it comes to cyber risk, visibility and uplift. That's why our NIST CSF assessment is more than a checklist, it's a partnership. We don't deliver reports. We deliver clarity, guidance and a path forward.

Duration:
Typically,
8 weeks

Our NIST assessment is designed to be light on your team and high on value. You'll gain a clear view of your cyber posture, all without the heavy lifting.

Tailored to your environment

We consider your specific systems, threat profile, and operational mandates.

Aligned to global standards

Be on the path to alignment with global security standards in weeks.

Executive-level visibility

Turn assessment results into actionable priorities leadership can get behind.

Actionable uplift plan

Receive a clear, prioritised roadmap you can execute immediately.
