

PAS and EMR Hospital Software

Fujitsu and Global Health teamed up to bring the combined MasterCare+ patient administration system (PAS) and electronic medical record (EMR) system to private hospitals in Australia and New Zealand.

An Intuitive Solution Clinicians Want to Use

MasterCare+ improves user experience for clinicians by consolidating patient observations and medical notes in the one place.

Clinicians access the system on a desktop or mobile device.

No more searching for records or missing results.

Clinical functionality includes:

- Observation charts
- Pathology and Imaging orders and results
- Reporting
- Documents and scanning
- Patient journey board- care pathway
- Medication lists
- Allergies
- Discharge summaries
- Patient education

MasterCare+ Software as a Service decreases capital expenditure

MasterCare+ is securely cloud delivered and maintained by our team of technical experts, reducing your operating costs.

Leave us to care for application performance and security while you focus on delivering patient care and improving revenue.

Services include:

- Per patient per episode revenue and expenditure
- MBS and ABF Billing
- Updates to reference materials (e.g. MIMS)

- Security monitoring
- Performance monitoring
- Business continuity
- Satisfied workforce.

"It has been a fantastic experience working with Global Health to deliver the first implementation of their MasterCare+ EMR solution to our 90-bed hospital Matilda Nepean. The EMR is Australia's answer to EMR adoption in the Australian Private Hospital market and we are proud to be collaborating on the design and delivery of a cutting edge technology that will benefit Private Hospital's around the country."

Dr Harry Pannu – CEO Matilda Healthcare
