

Power BI Foundations Accelerator

Collaborate, share, and derive data driven insights securely and confidently

Customer Challenge

Organisations are faced with continuing pressure to gather and manipulate data in ways that are meaningful for business users to derive actionable insights. The limitations that exist with data presented in spreadsheets, and their inability to share information efficiently and securely, presents barriers to collaboration, and confidence in the data. The challenge is to establish the right foundations early to address these issues.

Solution

Our Power BI Foundations Accelerator ensures the end user experience is consistent, fast, and intuitive. Our approach is based on evidenced based research providing leading practices to enable organisations to rapidly establish design and development guidelines, governance, collaboration, and security practices that engender confidence and trust in their reporting platform.

Customer Value

- Well designed, intuitive reports and dashboards that encourage user adoption and self-serve reporting
- Reduced resource demands from IT departments
- Enhanced data security through the provision of governance, role definition and process clarity
- More effective collaboration, and sharing of data and insights amongst users

Fujitsu Data & AI's Power BI

Power BI Accelerator

FUJITSU Jink

Well designed, intuitive reports and dashboards
