

# Virtual Chief Information Security Officer (vCISO) Services

Cyber leadership without the overhead

**On-demand access to security leaders who guide strategy, governance, and risk management, tailored to your organisation's needs.**

At Fujitsu, we know many organisations need senior security expertise but don't always have the budget or resources for a full-time CISO. Without clear leadership, cyber programs can lack focus, governance, and executive alignment.

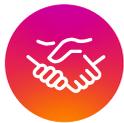

Our vCISO service provides organisations with strategic cybersecurity leadership on a flexible basis. Designed for businesses that require expert guidance without the commitment of a full-time CISO, this service offers access to senior-level security consulting tailored to your specific organisational context, risk environment and business objectives.

**A trusted service working for your future.**

### Cyber program overview

Assessment of your current strategy, maturity and governance model.

### Executive engagement

Briefings and reports that translate technical risk into business impact.

### Roadmap and prioritisation

Practical action plans that focus effort where it matters most.

### Risk and compliance guidance

Alignment with standards such as:

- ISO 27001
- Australian ISM
- New Zealand ISM
- PSPF
- PSR Framework
- Essential Eight
- NIST

### Industry experience

Access to senior advisors with track records in complex, high-risk environments.

### Flexible engagement

Scale support up or down based on your organisational needs.

### Strategic oversight

Clear direction for your cyber program, from risk management to compliance alignment.

## Key benefits at a glance

### Cost effective

Get CISO-level expertise at a fraction of the cost of a full-time hire.

### Assurance for stakeholders

Demonstrate clear governance and oversight to boards, regulators and clients.

### Faster access

Tap into senior security leadership without the lengthy recruitment cycles.

### Sustained maturity

Ongoing guidance to improve resilience and stay ahead of threats.

## Our approach

We understand the complex strategic landscape our clients face. That's why our vCISO service is designed to fit your context, whether you're building a program from scratch or refining a mature environment.

### Expert guidance

Our senior professionals bring real-world experience to every engagement.

### Flexible delivery

Be on the path to alignment with global security standards in weeks.

### Tailored focus

Aligned to your strategic priorities, risk appetite and regulatory drivers.

### Proven success

Trusted by organisations across enterprise and government.

**Contact us today to discuss how our vCISO service can strengthen your cyber governance and resilience.**
