

Vulnerability Management Services

Protect your Information Technology (IT) and Operational Technology (OT)

Proactively identify and mitigate security weaknesses in your IT and OT environment

Our Vulnerability Management service is a risk and threat-based service that monitors for vulnerabilities, establishes your threat exposure, and actively remediates findings in your organisation's IT and OT environment.

This Service offer real-time threat intelligence, so that remediation activities can be prioritised to address active threat campaigns.

Reduce the 'attack surface' of your organisation

Eliminate blind spots
Gain visibility into identity vulnerabilities and shadow infrastructure.

Prioritise high-impact threats
Uncover on-prem and cloud weaknesses and act on what matters most.

Avoid costly compliance shortfalls
Meet industry security standards and regulations.

Reduce human error risks
Protect against phishing and employee errors.

Stay up to date on your real-world security posture and exposure to active threat campaigns.

We help you make informed risk decisions:

As a full managed service provider, we have extensive experience in finding, assessing, and remediating genuine risks. We use our unique broad view of your organisation to combine technical know-how with business insights to enable you to make informed risk decisions (accept, transfer, treat) to then apply the appropriate countermeasures.

Implementation

An iterative implementation starting with what we consider Essentials – which are then built upon to provide complete coverage alongside the customer's digital transformation.

Ongoing service

Scan and monitor for risky configurations and components.

Optional integrations

Assess findings and prioritise remediation.

With a dedicated team across Australia and New Zealand, we understand the unique threat landscape and regulatory environment faced by organisations in this region.

Reduced risk of costly data breaches

Enhanced compliance with regulations

Proactive identification and remediation
