

Transforming manufacturing operations and supply chains with GLOVIA® & GlobeRanger

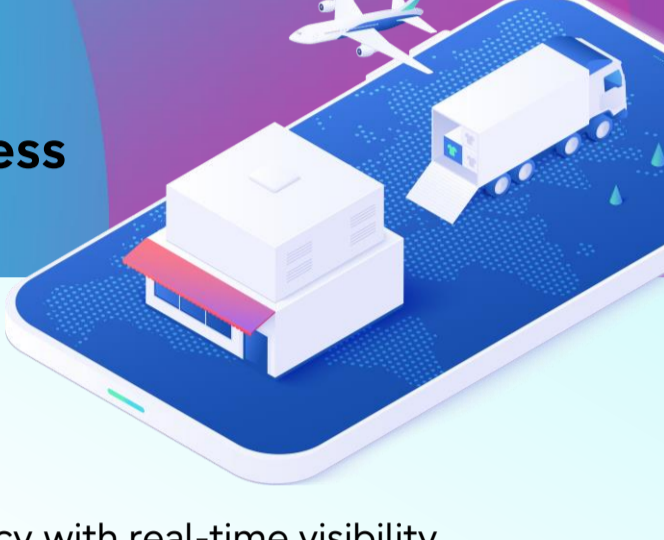

Beyond disruption: the critical challenges facing today's supply chain

- 01 Lack of real-time visibility**
 Blind spots, inaccurate data, and delayed insights into inventory, production, and assets.
 
- 02 High operational costs**
 Manual processes, inventory errors, high training costs for operations employees and inefficient workflows drive up expenses.
 
- 03 Integration headaches**
 Disparate IT and OT systems create data silos and hinder automation.
 
- 04 Error-prone operations**
 Manual scanning and data entry lead to miscounts, misroutes, and rework.
 
- 05 Limited agility**
 Slow response to demand shifts, supply disruptions, and equipment failures.
 
- 06 High cost of ERP customization**
 Built for record-keeping, ERPs fall short on frontline engagement. Customization is expensive and often leaves users with clunky, unintuitive tools.
 

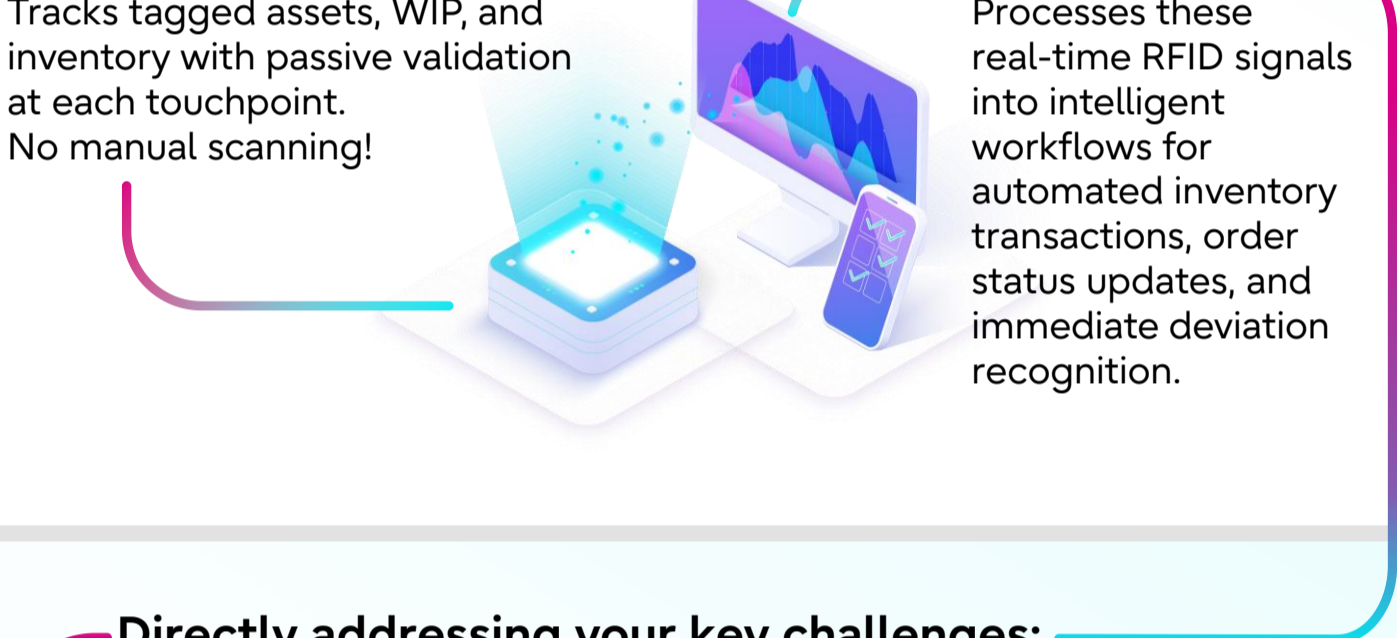

The solution: GLOVIA® & GlobeRanger – unified for success

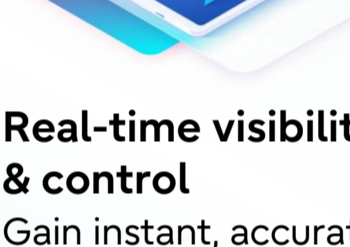

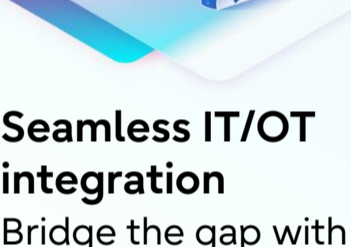

Error-proof operations. Real-time decisions. Scalable Control.

This unified solution brings operational efficiency with real-time visibility across your supply chain and manufacturing. Its proactive error prevention uses automated systems to detect and correct anomalies, significantly reducing rework. The result is scalable control, empowering teams for flawless execution from production to shipment.

How they work together:

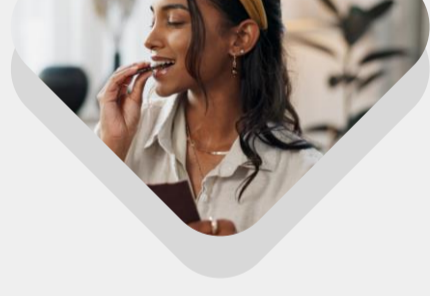

Directly addressing your key challenges:

- Real-time visibility & control**
 Gain instant, accurate insights into every asset and process using AI vision.
 
- Reduced operational costs**
 Eliminate manual errors, optimize inventory, and streamline workflows.
 
- Seamless IT/OT integration**
 Bridge the gap with automated data flow from the physical world to your digital systems.
 
- Leveraging AI to automate error prevention**
 The system flags issues before they become costly problems, ensuring precision.
 
- Enhanced agility & responsiveness**
 Make data-driven decisions faster and adapt to change with confidence, enabling business validations and making intelligent decisions closer to the inventory.
 

Driving impact for industry leaders:

Mars Wrigley Confectionery - world's leading manufacturer of confectionery, food, and pet care

Challenge
 Modernizing its archaic B2B ordering process for various partners, who desired a seamless, 24/7 e-commerce experience with full visibility, intuitive UI, and independent control over orders and invoicing.

Solution
 Self-service community portal, built on Fujitsu GLOVIA® OM and running on top of Salesforce, offering customers comprehensive ordering, tracking, and information access, including real-time inventory visibility, full product catalogs, personalized recommendations, delivery updates, and promotion details.

Impact
 Improved ordering process, reducing inefficiencies and costs, driving 5% organic growth in a traditionally flat category, and enhancing overall customer satisfaction.

Suntory Global Spirits - world leader in premium spirit drinks

Challenge
 Monitoring the production, storage and distribution of millions of its barrels using a process heavily reliant on paperwork, leaving it exposed to error.

Solution
 GlobeRanger iMotion® IoT Edgware platform to connect sensors and IoT devices, enabling automated, RFID-tagged tracking of barrels through every production stage for rich data on production, storage, and distribution.

Impact
 Total visibility of the production process, significantly reducing errors and waste, freeing supervisors from paperwork for more critical tasks, and enabling deeper consumer engagement with the product's lifecycle.

Unlock real value in your operations with GLOVIA® & GlobeRanger solution

- 
- 01 360° Real-time visibility**
 - 02 Optimized costs & inventory**
 - 03 Flawless order fulfillment**
 - 04 Maximized uptime & OEE**
 - 05 Data-driven decisions**
 - 06 Future-proofed operations**
